

# PUSHPAK JAJU

San Jose, CA | +1 (623) 221-0674 | [pushpakjaju.vercel.app](mailto:pushpakjaju.vercel.app)  
[pushpak145@gmail.com](mailto:pushpak145@gmail.com) | [linkedin.com/in/pushpak-jaju/](https://linkedin.com/in/pushpak-jaju/) | [github.com/Pushpak145](https://github.com/Pushpak145)

## EDUCATION

<b>Arizona State University</b> , Tempe, AZ	<b>Aug 2023 - May 2025</b>
Master of Science in Computer Science; <b>GPA 3.93/4.0</b>	
<b>PES College of Engineering</b> (Affiliated to Visvesvaraya Technological University), India	<b>Aug 2017 - Sept 2021</b>
Bachelor of Engineering in Computer Science; <b>GPA 3.6/4.0</b>	

## TECHNICAL SKILLS

**Programming Languages & Databases:** Python, TypeScript, JavaScript, Node.js, Java, SQL, MongoDB, PostgreSQL.

**Web Technology:** HTML, CSS, REST APIs, CI/CD Pipelines, Jenkins, API, Web Scraping.

**Tools:** Tableau, Google Cloud, AWS, Apache Spark, Hadoop, Kafka, Kubernetes, Docker, Git, Jira, Power BI.

**Frameworks & Packages:** Django, Flask, Spring Boot, Angular, React, Numpy, Pandas, Pytorch.

## WORK EXPERIENCE

<b>Software Engineer Intern</b> , MyAscend AI, San Jose, CA	<b>Jul 2025 - Dec 2025</b>
<ul style="list-style-type: none"><li>Developed a unified <b>passwordless authentication framework</b> integrating email verification links and phone OTP verification using <b>Next.js server actions</b>, <b>Supabase Auth</b>, and <b>Temporal workflows</b>, eliminating duplicate accounts and improving onboarding.</li><li>Redesigned the group invitation experience with enforced contact validation and automated organization setup, resolving pre-existing user conflicts and reducing account-linking errors by <b>90%</b> in multi-tenant environments.</li><li>Implemented an end-to-end profile upload system with image validation, cropping, and instant preview via <b>React</b> and <b>Supabase storage</b>, achieving <b>99%+ successful updates</b>.</li><li>Optimized organization member management by refining SQL JOIN performance and enabling real-time updates through React state synchronization, allowing <b>25+ users across 4 organizations</b> to collaborate seamlessly and reducing page load times by <b>40%</b>.</li></ul>	
<b>Software Engineer</b> , Arizona State University (EOSS Tech Team), Tempe, AZ	<b>Jun 2024 - May 2025</b>
<ul style="list-style-type: none"><li>Implement and manage a dynamic ride scheduling feature for a campus cart application using <b>React and TypeScript</b>, enabling users to filter and view scheduled rides based on campus locations, achieving a <b>40% reduction in search time</b>.</li><li>Engineer a robust rescheduling system that allows users to modify ride details, such as date, time, locations, and driver, directly within the interface, streamlining the process and resulting in a 30% boost in user engagement.</li><li>Transform a static ride schedule table into an editable interface, enabling admins to directly modify ride details (pickup time, locations, driver, notes, and status) and delete individual rides, reducing administrative <b>update time by 30% and improving data accuracy across 200+ rides weekly</b>.</li></ul>	
<b>Data Engineer</b> , Cognizant, Bengaluru, India	<b>Aug 2021 - Jul 2022</b>
<ul style="list-style-type: none"><li>Revamped ETL workflows and optimized stored procedures in a data warehouse, leading to a <b>25% boost in query performance and a 20% reduction in data processing time</b>, thereby increasing overall system efficiency.</li><li>Built APIs for seamless data integration between <b>SQL Server and Google Cloud BigQuery</b>, ensuring smooth data flow, enhanced scalability, and reliable performance under heavy workloads.</li><li>Formulated detailed data quality baseline flow diagrams, including robust error handling and comprehensive test planning, with the goal of decreasing data errors by 40% and significantly improving data reliability.</li></ul>	

## PROJECTS

<b>Swarm Intelligence-Based Distributed Database System</b>	<b>Sep 2024 - Nov 2024</b>
<ul style="list-style-type: none"><li>Innovated a distributed database system leveraging swarm intelligence algorithms (ACO and PSO) for adaptive data partitioning and query optimization.</li><li>Deployed a fault-tolerant architecture by integrating <b>MongoDB, Docker, Kubernetes, and Apache Kafka</b> to achieve seamless scalability and efficient communication across distributed nodes.</li></ul>	
<b>Elastic Face Recognition Application (IaaS)</b>	<b>Feb 2024 - Apr 2024</b>
<ul style="list-style-type: none"><li>Designed a scalable face recognition application on AWS EC2, utilizing a multi-tier setup for efficient workload management and optimized resource allocation.</li><li>Configured <b>autoscaling 20 EC2 instances</b> for the application tier, allowing automatic adjustment based on demand, minimizing costs and enhancing performance.</li></ul>	
<b>Serverless Video Analysis Pipeline (PaaS)</b>	<b>Feb 2024 - Apr 2024</b>
<ul style="list-style-type: none"><li>Created a serverless video processing pipeline with AWS Lambda for scalable video analysis and face recognition, leveraging AWS services for efficient task execution.</li><li>Streamlined data handling workflows by integrating AWS S3 for storage and Lambda functions, ensuring high concurrency and low latency in real-time processing.</li></ul>	
<b>Predicting Phenotype in Yeast, Rice, and Wheat</b>	<b>Mar 2021 - May 2021</b>
<ul style="list-style-type: none"><li>Developed a machine learning model achieving 94% accuracy in predicting organism physical characteristics by utilizing advanced algorithms and genomic data.</li><li>Leveraged diverse ML techniques, such as ridge regression, lasso regression, random forest, GBM, SVM, and genomic BLUP, to boost predictive accuracy.</li></ul>
